Hi Gary,

Thanks so much for your help.

Would it be possible to have further clarification regarding the following items in the tables i.e., all of the nondetect results are indicated as "BDL", "ND" or "0.00". Do you have the concentrations associated with these values available.

Thanks again.

Marian

Subject

Passaic River Data Request

Marian, as per your request, please find attached several files:

- 1) 2004 contaminant data for blue crabs
- 2) 2004 data for blue crab and lobster size and weights

3) 2002 data for the Passaic River watershed including above and below Dundee Dam - See Appendix I and IV

4) 2002 dioxin/furan data for a limited number of Passaic R. samples

These data are defined in the following reports and can be found on:

<http://www.state.nj.us/dep/dsr/njmainfish.htm>

Horwitz et al., 2005. Final Report: Routine Monitoring Program for Toxics in Fish (2002 data)

and

Horwitz et al., 2006. 2004 Routine Monitoring Program for Toxics in Fish: Year 2 - Estuarine and Marine Waters.

Hope this is helpful!

Regards,

Gary
